

### Special Call Acceptance

This capability provides the ESP's client with the ability to select up to 12 customer telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller the customer is not accepting calls. Calls from numbers outside the specified LEC exchanges will ring normally.

GTE Product Name	BSE or CNS
Special Call Acceptance	CNS

### FEATURE OPERATION:

See description above.

### TECHNOLOGICAL AND FEATURE INTERACTION CONSIDERATIONS:

1. This feature is available in the following central office switches:

Switch Type	Earliest Generic Release
DCO	17.2
EWSD	9
GTD-5	1.6.2.1
DMS-10	404.4
1AESS	1AE9
5ESS	5E9.1
DMS-100	BCS31

### Special Call Waiting

This capability provides the ESP's client with the ability to choose up to 12 numbers which can activate Call Waiting. Incoming calls placed from numbers not selected by the customer receive busy signals when the customer's line is busy.

GTE Product Name	BSE or CNS
Special Call Waiting	CNS

### FEATURE OPERATION:

See description above.

### TECHNOLOGICAL AND FEATURE INTERACTION CONSIDERATIONS:

1. This feature is available in the following central office switches:

Switch Type	Earliest Generic Release
DCO	17.2
EWSD	9
GTD-5	1.6.2.1
DMS-10	404.4
1AESS	1AE9
5ESS	5E9.1
DMS-100	BCS31

2. Customers may not subscribe to Call Waiting and Special Call Waiting on the same line.

### Three Way Calling

This capability allows an ESP's client to add a third party to an existing conversation without operator assistance. The party initiating TWC may hold one party with privacy exclusion while dialing and talking with another party and can later include the held party in TWC.

GTE Product Name	BSE or CNS
Three Way Calling	CNS

### FEATURE OPERATION:

A customer subscribing to TWC is able to add a third party to a stable call regardless of which party originated the call. The subscribing customer flashes his switch-hook, receives recall dial tone, dials the third party, and flashes the switch-hook again. The third party may be added to the call while the station is receiving ringing or the subscribing customer may speak with the third party in private prior to adding the third party to the stable call.

The third party will be disconnected from the call if the party initiating the TWC flashes the switch-hook.

If the party initiating the TWC disconnects, all parties are disconnected.

If a party other than the party initiating the TWC disconnects, the remaining two parties may continue the call.

### TECHNOLOGICAL AND FEATURE INTERACTION CONSIDERATIONS:

1. This feature is available in the following central office switches:

Switch Type	Earliest Generic Release
DCO	15.1
EWSD	9
GTD-5	1.6.2.1
VIDAR	7.0.1.2
DMS-10	210.4
1AESS	1AE8
5ESS	5E2
DMS-100	BCS17
#2EAX	1.2.9.1

2. Recursive use of TWC is limited only by resources of the switching system and transmission capabilities (A adds on B, B adds on C, C adds on D, etc.).
3. Dialing restrictions of a station continue in effect when dialing a party to be added on.
4. Speed Calling can be used when adding a party.
5. The initiator of TWC should not receive a Call Waiting tone. Other parties on the call can receive and respond to a Call Waiting tone.
6. Either or both legs of a three way call may be an interexchange or international call.
7. TWC is not available on lines with two or more parties.
8. Reference:
  - o LSSGR (FR-NWT-000064), FSD 01-02-1301, Three-Way Calling, Issue 1, July 1989, Revision 1, September 1990, Module TR-TSY-000577.

## **2. Appendix 1 - Region Specific Services - Technical Descriptions for Packet Switched Access Arrangements**

### **Priority-Packet**

This capability allows the Enhanced Service Provider (ESP) the ability to establish a "priority" status to the ESP's data as it processes through the network.

GTE Product Name	BSE or CNS
Priority - Packet	BSE

This service, if offered as a BSE, is associated with the X.25 Packet Switched and X.75 Packet Switched basic serving arrangements.

### **3. Appendix 1 - Region Specific Services - Technical Descriptions for Dedicated Access Arrangements**

#### **ControlLink(R) Digital Channel Service**

This capability provides the Enhanced Service Provider (ESP) the ability to aggregate their intraexchange telecommunications services between their premises and the local serving wire center onto a digital local loop. The digital transmission rate available is either DS1 (1.544 Mbps) or DS3 (44.736 Mbps). The services which can be combined include private line and switched services, intraexchange, intraLATA and interLATA services.

GTE Product Name	BSE or CNS
ControlLink(R) DCS	BSE

#### **TECHNOLOGICAL AND FEATURE INTERACTION CONSIDERATIONS:**

1. This service provides only the common line link between the customer and the local serving wire center. End-to-end private line and exchange services will utilize this digital link to the customer's premise, rather than the analog loop which might otherwise be provided.
2. This service will be available on a digital basis at the network interface on the customer's premises.
3. Normal analog channel network interface specifications will be superseded by the electrical specifications of the 1.544 Mbps (DS1) or 44.736 Mbps (DS3) channel which is actually terminated. Each digital channel provided will have an identity only as a "time slot" within a DS1 or DS3 loop.
4. Compatible digital to analog conversion equipment must be provided by the customer to derive the desired channelized services. Any Channel Service Units (CSUs) necessary for digital services are the responsibility of the customer.

#### **4. Appendix 1 - Region Specific Services - Technical Descriptions for Dedicated Network Access Link Basic Serving Arrangement**

##### **Message Waiting Indication - Audible Ring Burst**

This capability provides the Enhanced Service Provider (ESP) with the ability to activate an alerting signal in the form of a special ringing cadence to their client's line to inform them that a message is waiting. The reminder will be repeated at a specific interval programmed by the Telephone Company.

GTE Product Name	BSE or CNS
Message Waiting Indication - Audible Ring Burst	BSE

##### **TECHNOLOGICAL AND FEATURE INTERACTION CONSIDERATIONS:**

1. This feature is available in the following central office switches:

Switch Type	Earliest Generic Release
GTD-5	1.7.1.1

2. This feature is in addition to the stutter dial tone that normally represents a message waiting.

This service, if offered as a BSE, is associated with the Dedicated Network Access Link basic serving arrangement.
